

RIV Saves You Energy Cost While Keeping You Warm or Cool

Riv Heating Installations' cutting edge HVAC equipment has already transformed many people's homes with a furnace upgrade that not only ensures incredible comfort, but also provides you with remarkable energy savings. As Ron explained, replacing your old furnace with a **RUUD modulating + 94% efficient** gas furnace with DC variable fan motor will eliminate temperature swings in your home.

With Spring now here and Summer on the way, owner Ronald Rivard is looking to double those energy savings by installing or replacing your old cooling unit with the latest air conditioning equipment: **RUUD Environmental Earth Friendly 16 seers, 2 stage cooling** which will bring you top energy savings.

Now with cost cutting energy saving equipment and environmentally friendly cooling units, you can allow yourself to relax this coming summer in an ideal atmosphere enjoying the sunny season.

And of course you'll get the peace of mind knowing Ron's 15 years of experience in residential installation and service is there to support you. As they say, "nothing can go wrong with Ron".

If your home's heating and cooling systems are stuck in the 80s, you are consuming an excess of energy and you're probably overdue for a visit from Ronald Rivard and RIV Heating Installations. Call today and learn about the advances that enhance your home comfort while saving energy and money. Phone Ron and his team at **613-830-0431**.
